SENSORY CARDBOARD
FIELD ACTIVITY 01
due 30 jan 2014

The opportunity to create a small world between two pieces of cardboard, where time exists yet stands still, where people talk and I tell them what to say, is exciting and rewarding. - Chris Van Allsburg

4 SENSATIONS : 4 DESIGNS

Working only with cardboard and paper as materials – Express each of the four concepts below though a cardboard physical form/model. You may use color, glue, and tape to assemble your final artifact. Your object must be three-dimensional and not a drawing. Bring physical models to class for critique. You must also document your piece online through text and images using hackster.io.

1 prickly
2 mushy
3 hot
4 moist
